osmanfurkansimsek@gmail.com

I am an industrial engineering and management master student in DTU. I have also 4 years of management experience in the Turkish Military. I am looking for a student job during my master. I prefer to work in the management consulting industry. Because there are many various problems and solutions that I can learn and try to solve. Also, working with data is fun for me. I am a curious, open-minded and fast learner person. I am interested in supply chain management that I have courses about it. I can make contributions to a company with my top skills, which are

- **COMPLEX PROBLEM SOLVING** is the area that I have experiences. As an engineer in military, I solved a lot of management and logistic problems. I used operation research techniques and computer programs like Excel based OpenSolver.
- **CRITICAL THINKING** is my way of approach the situations. I have analytic thinking mindset. This is helping me to be creative and analyse the problem.
- **COMMUNICATION** is area that I am good at. I took courses about communication and body language. I used my communication and persuasion skills effectively in military for my hundreds of subordinates and soldiers.

WORK EXPERIENCE

From 15 August 2018 to Now

Kiin Kiin Restaurant in Copenhagen – Waiter

During my study period, I am working as a waiter to cover my expenses in the Kiin Kiin Restaurant which is a “Michelin Star” restaurant. For me, it is a very interesting experience. As a working experience, I learned a lot about communication and being service minded in a multicultural environment. Also, I got used to shifts with flexible hours.

From 14 July 2016 to 14 April 2018

Commando Company Commander in Batman – System Engineer and First Lieutenant

As an officer, I was a commander of 314 men. My duty was to manage the company in operation and train, coordinate and lead the people. In this job, I learned how to

- Take responsibility for the whole process and make collaboration,
- Work in a fast-paced environment and strict deadlines,
- Manage and organize the company.

From 30 August 2014 to 14 July 2016

General Commandership of Gendarmerie in Ankara – System Engineer and Lieutenant

As a Gendarmerie Officer, my duty was to make projects about management, make Gendarmerie systems more efficient and solving problems in the city. In this job, I learned how to

- Use Office Programs, make presentations and write reports,
- Do operations research to make systems more efficient,
- Annalise data.

PROFILE

After my education and work experiences in Turkey, I chose to come to Denmark for developing myself. I am a curious, ambitious, well-disciplined character. I want to devote my life to solve an important problem related to science such as climate changing. My personal rule is trying to be best in whatever I do. I have experiences about conflict and crisis management. I can stay calm in every situation and work in a hectic environment. I am 27 years old. I have staying and full-time working permit in Denmark and I have also a driver and first aid licence. In my leisure times, I like to do exercise, play the guitar, read books and watch documentaries about history, science and technology.
